PROFESSIONAL PROFILE

I hold a Bachelor's degree in Software Engineering specializing in web development. I have technical experience in Node.js, React, and MongoDB and I am deeply passionate about data analysis. My technical skills include Python, SQL, and Excel, which I use for data manipulation, visualization, and deriving actionable insights. Additionally, I possess a creative mindset, strong problem-solving abilities, effective teamwork, communication skills, and a high level of decision-making autonomy.

WORK EXPERIENCE

Associate Technical Architect

COUPA | June 2025 -Present

In my role as an Associate Technical Architect, I design and implement complex technical solutions for the Coupa Business Spend Management (BSM) platform, translating business requirements into robust architectural designs. I specialize in building advanced API and flat-file integrations with ERPs (such as NetSuite), ensuring seamless data flow and applying Coupa's Integration & Implementation Methodology. Furthermore, I manage the technical aspects of development projects, leveraging AI-driven platform modules to optimize performance and bridge the gap between business needs and technical execution.

Technical Support Engineer

COUPA | August 2023 – June 2025

As a Platform Tech Support Engineer at Coupa, I specialize in resolving a range of technical issues, including performance optimization, Single Sign-On (SSO) configuration, API troubleshooting, and log retrieval. I consistently manage 15 to 20 cases per week with a strong success rate, ensuring timely and effective solutions. My focus remains on delivering top-tier service to our enterprise clients, maintaining high levels of efficiency and customer satisfaction.

Bilingual Customer Service

SITEL | August 2020 – April 2023

Representative In my role at FedEx Campaign, I successfully achieved metrics with a performance rate exceeding 90% while handling up to 100 calls per day. I prioritized customer care for clients eagerly awaiting their package deliveries, ensuring high effectiveness and satisfaction levels.

LANGUAGES

Spanish: Native

English: Fluent

French: Basic -Intermediate

TECHNICAL SKILLS

Python
SQL/MYSQL
MongoDB
React
Ruby
Java Script
API/CSV

SOFT SKILLS

Resilient
Attention to detail
Teamwork
Problem-solving skills
Time management
Adaptability

EDUCATION

Henry BootCamp

Full Stack Developer
August 2022 - February 2023 | Argentina

Politécnico Grancolombiano University

Software Engineering
February 2020 - March 2023 | Bogotá, Colombia

UNIMINUTO University

Computer Science
August 2016 - November 2020 | Bogotá, Colombia

PROJECTS

FULL STACK DEVELOPER – DOGS APP

I developed and designed a web application for dog breeds that includes searches, filters, sorting, and creation functionalities. The application allows users to easily search for specific dog breeds, apply filters to narrow down their results, sort the breeds based on different criteria, and even create new entries. I use React, Redux, and pure CSS for the front-end, while employing Node.js with Express for the back-end. The database was constructed using PostgreSQL and Sequelize.
